BEACHLOR'S DEGREE

East China Normal University

BS Computer Science *GPA: 3.82 (Currently)*

Shanghai, China

Sept 2024 - June 2028 (Expected)

SKILLS

Programming Languages: C++, Python, html, Hlsl, JavaScript, Unity Shader Language
Development Tools: Git, Latex, React, Vite, PyTorch
Game Engines & Graphics: Opengl, Unity

PROJECTS

Text-to-Fluid: Semantic Authoring of Fluid Simulation via Large Language Models *Unity, Unity Shader Language, C++*

This project aims to analyze the emotions contained in the input of users via the help of Large Language Model, and accordingly change the style of a unity-rendered sph fluid to represent this emotion Implemented a cartoon-style SPH fluid renderer in Unity. Integrated LLMs to dynamically map rendering functions and parameters based on natural language text inputs from users.

Stylized Terrain Generation from Text Descriptions *Python, PyTorch, CDSE API*

Developed a Deep Learning framework using Variational Autoencoders (VAEs) to generate stylized height maps. Integrated the Copernicus Data Space Ecosystem (CDSE) API for automated global terrain data acquisition and processing.

PUBLICATIONS

Text-to-Fluid: Semantic Authoring of Fluid Simulation via Large Language Models *International Conference on Computer-Aided Design and Computer Graphics*

Xubin Du, Juanjie Luo, Changbo Wang, Chenhui Li, Junyan Zhou, Nan Xiang

AWARDS

Lanqiao Cup National Software and IT Talent Competition

First Prize in Shanghai Provincial Level

MIIT, China

April, 2026

Lanqiao Cup National Software and IT Talent Competiton

Third Prize in National Final Level

MIIT, China

June, 2026

The Chinese Mathematics Competitions for College Students

First Prize in Shang Hai area

Mathematical Society of China

December, 2025
