BEACHLOR'S DEGREE

East China Normal University	Shanghai, China
BS Computer Science <i>GPA: In Progress</i>	Sept 2024 - June 2028 (Expected)

SKILLS

Programming Languages:	C++, Python, html, Hlsl, Unity Shader Language
Development Tools:	Git, Latex, Visual Studio Code
Game Engines & Graphics:	Opengl, Unity

PROJECTS

LLM based Fluid Rendered <i>Unity, Unity Shader Language, C++</i>
Implemented a cartoon-style SPH fluid renderer in Unity. Integrated LLMs to dynamically map rendering functions and parameters based on natural language text inputs from users.
Stylized Terrain Generation from Text Descriptions <i>Python, PyTorch, CDSE API</i>
Developed a Deep Learning framework using Variational Autoencoders (VAEs) to generate stylized height maps. Integrated the Copernicus Data Space Ecosystem (CDSE) API for automated global terrain data acquisition and processing.

AWARDS

Lanqiao Cup National Software and IT Talent Competition	MIIT, China
First Prize in Shanghai Provincial Level	April, 2026
Mathematics Competition of Chinese College Students	Mathematical Society of China
First Prize in Shang Hai area	December, 2025
